

NEWPORT,
BY CRANSTON & NORMAN,
127 THAMES STREET.

SATURDAY MORNING, NOV. 2 1850.

A THUNDER WHISTLE.—We have on two or three occasions referred to the importance of establishing effective Fog Signals or Alarms at the prominent points on our coast, when there is a necessity for their being seen to be passed in safety by navigators. And we, also, in the same connection, alluded to the mass of testimony which has been furnished us to show that the Fog Whistle can be heard against the wind, and through the surf, when bells had proved of no use whatever at such places. Beaver Tail Light, for instance, one of the cases in question. We wish now to speak more particularly of a very important enterprise which we understand is contemplated, and which, if carried into execution, will do more to protect our coast, than even the Light Houses, as they already exist. We understand that the matter has been fully explained to the Collector, and that it meets his approval. It is simply this:—

To attach horse-power to a machine for blowing Daboll's Air Whistle, at Beaver Tail, and to employ a very large Whistle which is to resemble a Thunder, and which can be heard at least ten miles. We understand that the engineers of the several steamers have pronounced this method entirely practicable, and say there is not a shadow of doubt but what, under ordinary circumstances, such a Whistle, if blown under a high pressure of air, would most certainly be heard ten miles distant.

The Collector informs us that the inventor of the Air Whistle called on him for estimates as to the cost of oil, per annum, for Beaver Tail Light, and found it to be about 500 gallons, which, in round numbers, would be, say, six hundred dollars. From an estimate made by the keeper of that Light, we learn that he is willing to furnish, provided for a horse, and superintend the machine for two hundred dollars per annum. This, therefore, would, of course, be the whole expense, per annum, that it would cost the Government, should they provide such a machine for Beaver Tail. Now, when we take into consideration the immense advantage to be derived from it, by vessels navigating this coast, the cost of keeping such a Signal there, sinks into comparative insignificance. Its importance is, in fact, beyond all price; and we can but hope that our navigation and commercial friends, everywhere, will be made to know and feel the importance of having the Government support this Thunder Whistle there, that its tones may be heard when fog, snow and storm render Lights unavailing. We all help pay for it, then why should not the Government give us this means of protection, which is so practical, so economical and so effectual.

These Machines have proved themselves of eminent service in producing sound, when propelled by hand-labor alone, and, in fact, any degree of pressure can be got up by this means; but as it will cost but a trifle more to use horse-power, it is far preferable, particularly at such places as Beaver Tail. On board of Light Ships, however, at sea, one man, or two men, at most, is sufficient for the purpose.

We are happy to announce that Capt. H. L. Shields, of the 3d Artillery, has received the honorable and important appointment of Judge Advocate of the Eastern Division of the U. S. Army; he has been relieved from duty at Fort Adams, and will proceed immediately to Troy, that being the headquarters of Gen. Wool, commander of the Division. Verily, fortune favors the brave.

JENNY LIND IN NEW ORLEANS.—The Directors of the new Odd Fellows' Hall, now building in New Orleans, have consented to erect a temporary structure on the second floor of their magnificent building, capable of accommodating 3000 persons. This is for the accommodation of Jenny Lind, who, it has been promised, will visit that city in January; provided a suitable hall can be obtained.

"Sir," said a pompous personage, who undertook to bully an editor, "do you know that I take your paper?" "I've no doubt, you do take it," replied the man of the quill, "for several of my honest subscribers have been complaining lately about their papers being missing in the morning."

Contraband Thanksgiving, Thursday, Nov. 23d.

Thanksgiving in Indiana, Thursday, Nov. 28.

"What are the chief ends of a man?" asked a Sunday School teacher, of one of his pupils. "Head and feet," was the prompt reply.

Bold Attempt at Bank Robbery—One of the Robbers Shot Dead. A bold attempt was made last night to rob the Village Bank, at Danvers, by a band of four persons. One of the robbers by the name of John C. Page, a brother-in-law of the Cashier, was shot dead by the private Watch of the Bank. The other three, said to be well known, are yet at large, but the police are in pursuit of them. The Traveller gives the following particulars:

At two o'clock this morning, Mr. Bateman, the Bank watchman, heard three or four persons approaching the Bank. They came to the door, which is of glass to within a few feet of the bottom, and has no shutters, and hailed to know who was inside, to which the watchman replied that he was there; and to another query as to what he was there for, he replied, to guard the bank. At that the robbers began to press against the door as if with a view to burst it open. The watchman warned them to desist, saying that he was armed, and that if they entered, he would shoot them. They still persisting, and he, fearing that their intention was to get in and overpower him, took up his gun, and fired amongst them, as they stood upon the outside of the door.

The noise of the gun awakened Mr. John Page, an aged and estimable citizen of the village, who lives in the house nearest to the bank, and only a rod or two distant. He came out, but he did not notice the body upon the ground, and returned into the house. Shortly after, he again came out, and was proceeding along in front of his dwelling, when he stumbled over the prostrate body.

The ball from the gun, it was afterwards ascertained, passed through one of the lower panes of glass, carrying away a part of the sash. Immediately after the discharge the persons outside were seen to run; but one of them, who was evidently wounded, only went a few rods, when he staggered and fell. The others escaped in a carriage, which they brought with them to the bank.

He stooped down and discovered that it was his own son. He immediately returned to the house, and aroused his son-in-law, Mr. Weston, who is Cashier of the bank, and together they carried him into the house, and he shortly after died. Neither Mr. Weston nor Mr. Page then knew of the affair at the bank, and they at first imagined that he had received a stab in some affray, but they soon had information of what had occurred.

The deceased was named John C. Page, and was unmarried. He was about 43 years old.

This sad tragedy has caused a great excitement in the region round about the scene of its occurrence. A Coroner's inquest is to be held upon the body, when the matter will no doubt be thoroughly investigated. Mr. Bateman, the chief actor in the affair, bears a good name among his townsmen.

Some time ago, the keys of the bank were stolen, and since that time the bank has been in apprehension of an attempted robbery.

It is supposed that the unfortunate man, when he found himself wounded, ran with an intention of getting into the house of his father, where he resided. He fell under an apple tree nearly in front of the house.

A RELIC.—Our reporter saw yesterday a silver watch that was taken from the wreck of the Tennessee, which boat sank in the Mississippi on the night of the eighth of February, 1823, nearly 27 years ago. For several years efforts were made to find the precise point that she sunk, and it was only about two years ago that it was discovered. Mr. A. Mathis, with a diving bell, and the usual attendant means, cut his way through vast masses of accumulated sediment, and finally got into the old wreck, from which considerable property was recovered. The watch to which we refer was found in a berth along with the bones of a man, and the dial indicates near about the time that the boat went down. The steel works are corroded and gone to decay, but the brass and silver retain their shape and surface. —*Chm. Com.*

SIR JOHN FRANKLIN.—The British papers received by the Canada contain the official reports, published by the Admiralty, upon the relics found at Cape Riley by Capt. Ommanney, and carried to England by Capt. Forsyth in the Prince Albert. They consisted of beef, pork mutton, and other bones, and pieces of rope, canvass and wool; which it was considered a settled point by the reporters, among whom were Sir W. Edward Parry, Sir John Richardson, and Capt. Sabine, must have been left by Sir John Franklin, and at a period as far back as 1845. Capt. Sabine seems disposed to regard the encampment at Cape Riley as a winter station of the last navigators; while Sir Edward infers that it is, in distress, they would have deposited some distinct notice of their situation.

GENERAL ASSEMBLY.

THURSDAY MORNING, OCT. 31.
Petition of School District, No. 19, in Coventry—rejected on the ground that the petitioners have remedy in the courts of law.

The Docket of Private Petitions, was then taken up and disposed of; some were granted and others were continued.

THURSDAY AFTERNOON.
Act to incorporate the Croton Manufacturing Company, with a capital stock of \$200,000 by a vote of the stockholders, was passed.

Act to incorporate the Franklin Manufacturing Company, with a capital of \$75,000, to be increased to \$250,000, was passed.

Act to incorporate the Providence and Bristol Railroad Company, was passed. Petition of Inspectors of State Prison, for the liberation of Arnold Pettes, was granted.

An act in amendment of the Election Law—providing that each voter shall place his ballot in a self-sealing envelope—reported by Mr. G. H. Browns, of the special committee appointed at the last session, was taken up.

Mr. Bosworth moved to lay it on the table but withdrew the motion at the request of Mr. Upton.

The debate was continued until a late hour, when the House adjourned to Friday morning.

The Georgia Helicon says there are 98 cotton mills in Georgia, Tennessee, South Carolina and Alabama, in which are invested \$1,000,000. They consume 94,000 bales of cotton per annum.

Jenny Lind's Movements.—We learn from private sources, that Jenny Lind will give several concerts in Philadelphia about the 20th of Nov. She will then proceed to: Baltimore, Richmond, Charleston, Havana, New Orleans, St. Louis and Cincinnati, and will sail for London in May next, to be present at the World's Fair.

LOLA MONTES.—This celebrated personage now in Paris, is separated from her husband, Capt. Heald. The Prince of Nepal who was pleased with her appearance, and who made her several presents, has left for his own country, and she does not wish to be consoled, since the departure of the Indian Prince. It is said in some quarters, that having studied the inconsistency of our humanity, she has resolved to retire into a convent. Her intention is to go to Madrid, and there enter the House of the Carmelites.

A BLOOD-THIRSTY DISPOSITION.—The New Albany (Ind.) Bulletin tells the following:

Wm. Gross, the young man who was lately convicted of murder, in the confession of his guilt, which was given in evidence on the trial, stated that he had no motive in the perpetration of the inhuman act, except the desire to gratify a fiendish thirst for blood, and a demoniac satisfaction in seeing the death struggles of his fellow beings, which feelings he had imbibed during the Mexican campaign.

The following paragraph is from a late number of the Pacific News, published in San Francisco:

Beating a Wife.—As an evidence of our advancement in the refinements of life, we might cite the fact that whipping wives is practiced to a considerable extent in this community. For this offence William Clay was yesterday fined \$15, and sentenced to five days' imprisonment.

The "Hoo Chor."—A correspondent of a mercantile house of Louisville, having recently visited the pork-packing points on the Illinois and Mississippi rivers, says, the number of hogs will fall very little, if any, short of last season. The number near the river will fall short on account of the scarcity and high price of corn last year, but the country back will make up this deficiency. The corn crop never was finer, he adds, and this will enable feeders to bring all their small hogs to market by late feeding. The estimate of hogs packed on the Illinois and Mississippi rivers, last season, including St. Louis, is 500,000. The general increase in Iowa, Mississippi and Illinois, will make up for any deficiency from last year.

ON DUTY.—That Miss Catharine Lawrence, second daughter of Abbott Lawrence, American Minister at the Court of St. James, is about to be married to the Marquis of Grafton, the eldest son of the Duke of Rutland.

Mrs. Taylor, relict of the late President, Mrs. Col. Bliss, and Dr. Wood and lady, left Baltimore on Monday morning for their residence in Louisiana.

It has been decided long ago that children born in a free State, though of a mother who is a fugitive from slavery, are free.

MARRIED.

In this town, on Thursday, by the Rev. S. Adlam, Mr. William J. Eldridge, and Miss Mary J. Sweet, both of this town.

DIED.

In Providence, 31st ult., Sarah Jane Earl, aged 17 years.

Marine Intelligence.

LIGHT! LIGHT!
The Handsomest, Cheapest, and Best

MARSH'S PATENT OIL.
THIS is a new invention, recently introduced and now very extensively used by the public. Mr. Marsh is constantly receiving orders from all over the world.

Among them we select the following:

MANN'S PATENT OIL.—This is the oil given to a newly invented Oil for combustion.

Mr. Marsh. Having tried it ourselves, we can speak from experience, and do not hesitate to award it a high order of merit. It is entirely free from grease or such white humors, and is not liable to the too common objection of almost all painting fluids, that of exfoliating. It gives a rich and steady luster to the surface.

We recommend a trial to those who would
tain a beautiful light.—[Boston, January 1851.]

Offices, in New York, 190 Third-st.
" Boston, 11 State-st.
" Providence, Exchange-st.
Newport, March 19, 1850.

THE greatest labor-saving article yet discovered.
By its use, washing machines and laundries are
dispensed with, and not one quarter of the labor is
required to do the washing. For full particulars

The Fluid is a chemical compound of sufficient strength to extract all foreign substances from the cloth, by simply boiling a small quantity of it with the clothes, and without the slightest injury to the most delicate fabric.

the old-fashioned fear of clothing consequent upon the use of the pounding barrel, is wholly avoided, *garase saray* is thus made. It is emphatically the female's friend.

any will be refunded,
Manufactured by CHARLES DYER, Jr. Prov-
encer, R. I.
For sale by NEWTON BROTHERS,
Nos. 126 and 128 Thayer-street,
Sole agents for New York.

Put away that dirty, greasy lamp, that has used you so much trouble by soiling your Carpets and smoking your rooms, and almost causing you become ill by striving to work or to read by its dim flame. Go to **McKENZIE'S**

out with a Can, Lamp, and Fluid, and you will do it all for about 75 cents, and you need spend no small sum to better advantage, and if you are dissatisfied with your purchase he will refund you the money. Try it.

LAMPS.—A rich stock of Solar and Glass, for Fluid, which will be sold for about cost; a rich one, Dinner.

WEBSTER'S QUARTO
DICTIONARY

"Webster's American Dictionary may now be commended, without reserve or qualification, as the best extant."—*President Olney of the Wesleyan University, Decmber, 1847.*

"I have always considered Dr. Webster's work on etymology as surpassed in fullness and accuracy by none in our language."—*President Wadsworth.*

I have been in the habit of using Dr. Webb's Dictionary for several years past, in preference to all others, because it far excels them all, in so far as I know, in giving and defining scientific terms."—*Peter H. Hitchcock, C. A. B. B.*

My judgement and feelings are most heartily permanently engaged in doing all that I can now Webster the standard wherever his name is spoken, as it deserves to be, must say it will be."*—Professor Stowe, of Cincinnati.*

Dr Webster's great work is the best Dictionary of the English language."—*Lea. Morn. Chron. die Lond. Literary Gaz.* of April 1st, speak in the following not forcible, but able

We reject that idea fair to become the
and Dictionary to be used by the hundreds
of people who are to inhabit the United
States.²¹ Signed by 104 Members of Congress.
